42nd Orthopaedic  
World Congress

28 - 30 September 2022

# PRELIMINARY SCIENTIFIC PROGRAMME

MESSAGE FROM THE  
SICOT PRESIDENT  
ASHOK JOHARI

## PLAN, PARTICIPATE, PERFORM!

I welcome you all to the 42nd SICOT World Congress in the wonderful city of Kuala Lumpur, Malaysia! Once you visit this enchanting and enticing country, you will want to visit it again and again!

With COVID abating, we yearn for meeting our friends and colleagues, as well for a 'face-to-face exchange of ideas and interaction. A wonderful congress has been planned with the joint efforts of Suresh Sivananthan, Margaret Fok and Philippe Hernigou. The later has planned a 'Subspecialty Day' to cater to the specialist needs of everyone. This will be on 28th September, first day of the Congress. SICOT has in all earnest focused on specialty education with the creation of the Board of Subspecialties (BOSS). On the next two days, we will have the usual workshops, paper presentations, panel and case discussions, debates, symposia, research presentations and award papers. A course on Polytrauma Management and on Disaster Management will be incorporated into the Subspecialty Day, and the 11th Educational Day and SICOT Diploma examination are also planned. The social side of the Congress is strong and well planned with a spectacular Opening Ceremony, the Networking Event, and the Valedictory event on the 30th.

Undoubtedly, the Congress scientific program will be of the highest standards with the participation of world authorities, subject leaders and the many partner organisations SICOT has. There will be something in it for everybody. I would particularly encourage our young surgeons to participate. I am sure, they will gain the most. We have three outstanding plenary speakers from different fields and they will enlighten us with their vast knowledge and experience. 13 Keynote Lectures are scheduled and Industry participation is ensured so that you could look at the latest developments in technology and their application.

So, what are you waiting for? Please plan to participate and do make all your arrangements to be in KL from the 28th to 30th September!

MESSAGE FROM THE  
CONGRESS PRESIDENT

SURESH SIVANANTHAN

On behalf of SICOT it is my great pleasure and honour to welcome you to the 42nd SICOT Orthopaedic World Congress in Kuala Lumpur, Malaysia, from 28 to 30 September 2022.

With the pandemic behind us and surgeons eager to travel, learn and participate in workshops we expect no less than 2000 delegates at this Congress. The Scientific Programme Committee has prepared a range of exciting and educational topics which will cater to both junior and senior surgeons as well as allied health professionals. We worked closely with industry to organise workshops, instructional course lectures and surgical training which will attract the hands-on participation of many surgeons from around the globe. SICOT has always attracted orthopaedic surgeons and allied health professionals from all over the world and 2022 promises to be an even better year as travel opens up and people get back to in-person conferences and meetings. You will be able to share your latest experiences and exchange ideas. At the same time, you can meet old friends and make new ones. You will have an exceptional opportunity to learn from world renowned experts, strengthen your skills with our Instructional Course Lectures, find new and innovative evidence-based treatments for your patients and engage with industry at the highest levels. In addition, Kuala Lumpur or “KL” is a relaxed and multicultural city, which is an ideal environment to think, learn and enjoy.

Our local organising committee has worked hand in hand with SICOT and Malaysian orthopaedic surgeons to bring together a fantastic scientific programme, an amazing social programme and wonderful industry events which will ensure that your participation is well worth your time and effort. See you in Kuala Lumpur in September!

## MESSAGE FROM THE SCIENTIFIC PROGRAMME CHAIR

### MARGARET FOK

As the scientific programme chair, myself and co-chair Dr Khaled Sarraf, would like to welcome you to the SICOT Orthopaedic World Congress in Kuala Lumpur, Malaysia on 28-30th September 2022.

After more than 2 years of COVID 19 Pandemic, of which we could interact with each other on mainly different internet platforms, this congress marks a valuable and exceptional opportunity to see each other in person finally. This year, we are very excited to have this SICOT annual congress in the Asia Pacific region. Asia Pacific comprises of many nations, each with its own unique composition of ethnicity and culture. Malaysia is one of the countries that is a good representation of Asia Pacific, being a multi-ethnic and multireligious country with a diverse population. It is a true melting pot of a myriad of cultural traits, akin to SICOT and the Orthopaedic World Congress.

Despite that our main programme this year has been shortened to 2 days, we can assure you that the quality has not been jeopardised. In truth, we have created a compact, yet comprehensive and inspirational programme for everyone. We have invited over 250 esteemed faculties from all around the world to share their valuable experiences in 8 academic rooms and 1 industry room over the 2-day period. Apart from lectures and talks, we provide an interactive platform, enabling our participants to ask questions, get involved in case discussions, and participate in live polling. SICOT strives to be diverse, equal, and inclusive. This year, more than any other time in the past, we have gone the extra mile to ensure faculty representation is truly diverse, considering of ethnicity and gender.

Apart from our international faculties, we have invited 3 world esteemed plenary speakers and 13 keynote speakers to our congress. Professor Michael Millis from Boston Children's Hospital, Harvard University, United States will be sharing with us about his experience on hip preservation, while Professor Shafi Ahmed from the Royal London Hospital will be talking about the management of orthopaedic oncology. Rehabilitation remains an integral part of Orthopaedics and Traumatology. This year we have invited Professor Edward Lemaire from University of Ottawa Faculty of Medicine to share his research on advanced technologies to improve mobility for people with physical disabilities. In addition, our keynote speakers, who are renowned in their subspecialised fields, will share their knowledge with our participants.

## MESSAGE FROM THE SCIENTIFIC PROGRAMME CHAIR MARGARET FOK

They are Gregory Bain (Shoulder & Elbow), James Calder (Foot & Ankle), Andrew Chin (Hand and Wrist), Chee Kidd Chiu (Spine), Peter Devane (Hip), Deborah Eastwood (Paediatrics), Guenter Lob (Injury Prevention), Vikas Khanduja (Hip Preservation), Claude Martin (Leadership), Selvadurai Nayagam (Trauma), Joo Han Oh (Sports & Arthroscopy), Marc Swiontkowski (Research), and Satoshi Toh (Microsurgery). Our 13 partnered societies including AO SDSTF, ARTOF, DMIS, EBJIS, ESSKA, Hull Deformity, ICRS, IODA, IOF-ESCEO, Tech-No bones, SOFCOT, WAIOT and WOC, will also be joining us to celebrate this event.

For the Pre-Congress activities, aside from the ever-popular Education Day for the orthopaedic trainees and young fellows, and International Course on Polytrauma Management and Disaster Management Course for all general and trauma surgeons, this is the first year that SICOT introduces the Subspecialty Day. Different specialty committees have designed dedicated programmes for delegates who would like to learn more from super-specialists in a particular area. These include Hip (co-organised with the Malaysian Hip and Knee Society), Infection, Knee (also co-organised with the MHKS), Limb Reconstruction and Foot and ankle, Paediatrics, Spine and Trauma.

No successful congress can be made possible without our industry partners. Our exhibition hall will be filled with our many different industry leaders, showcasing their latest products. These include well-known international companies as well as local business, displaying their specialised products. In addition, we have a separate industry room this year over the 2 days, with workshops organized by our industry partners. This enables registrants a better hands-on experience on selected products. Please do register in advance, as space is limited. Otherwise, registrants are welcome to mingle with our industry representatives in the courtesy room and exhibition hall.

With such an exciting programme, we cannot wait to see you all in person in Malaysia. The string of social and networking events alongside the academic platter will ensure everyone will have something memorable to look forward to.

# PLENARY SPEAKERS

## SHAFI AHMED - UNITED KINGDOM

Prof Shafi Ahmed is a multi-award winning cancer surgeon working at The Royal London Hospital. He has been given the accolade of the world's most watched surgeon as he has streamed live operations using virtual reality, social media and television for which he was shortlisted for a BAFTA award in 2019. He was nominated for the Nobel Peace Prize in 2020 for his humanitarian work and global surgical education. Former member of the Royal College of Surgeons of England Council where he led the global health programme, he also worked as an advisor to the Abu Dhabi government for digital transformation of health and innovation. He has set up surgical education programmes in over 20 countries including conflict zones. He delivered over 250 keynotes in over 30 countries and his work has been featured in over 400 newspapers and mainstream TV news channels.

## EDWARD LEMAIRE - CANADA

Prof Edward Lemaire is actively involved with research on technologies that improve mobility for people with physical disabilities. He is a Professor at the University of Ottawa Faculty of Medicine, Adjunct Professor in Mechanical Engineering, Human Kinetics, Health Sciences, and Systems Design Engineering and Investigator with The Ottawa Hospital Research Institute's Centre for Rehabilitation Research and Development. He is also Past President of the International Society of Prosthetics and Orthotics. His research has resulted in over 575 published papers and presentations that include intelligent prosthetics and orthotics, biomechanical movement analysis in 3D virtual environments, smartphone and artificial intelligence approaches to improve decision-making, and eHealth technology to enhance access to education and rehabilitation services.

## MICHAEL MILLIS - UNITED STATES

Prof Michael B. Millis is Professor of Orthopaedic Surgery at Harvard Medical School and holds the Oberg Family Chair at Boston Children's Hospital. He graduated from Harvard Medical School and did orthopaedic specialisation in the Harvard Orthopaedic Residency Program. He was an AO fellow in hip joint preservation with Prof Heinz Wagner in Germany. Through the years Prof Millis has acquired a unique amount of experience in hip preservation and profound knowledge of hip diseases in childhood and the young adult. He emerged as a global leader in the development of treatment algorithms, advanced surgical techniques and the teaching of educational concepts. He is the founding Director of the Adolescent/Young Adult Hip Unit at Boston Children's Hospital. His academic work spans several hundred publications and received numerous international awards.

## 11TH EDUCATIONAL DAY

Chairs: HS Chua (Malaysia), M Khanna (India)

The aim of the Education Day is to provide a comprehensive review course for the residents and an evidence-based update for the practising surgeons.

This year we are moving away from an anatomical region themed based Educational Day. There will be short lectures and plenty of time for questions and answers covering 8 subspecialties including paediatric orthopaedic, arthroplasty, sport surgery, orthopaedic oncology, foot and ankle, spine, trauma, hand and wrist. Further highlights of OSCE session as well as coverage in knee replacement fundamentals will be included. Time will also be spent discussing the ethical issues in young surgeons' practice.

So, if you wish to learn, share, debate and discuss ideas and surgical techniques in an exciting environment with a group of international surgeons in one single room, the Educational Day is the place for you. We look forward to seeing you there!

### Session I - Paediatric Orthopaedics

**Moderator/s:** M Abdelaal (Egypt), K Sarraf (UK),

**Speakers:** D Eastwood (UK), K Sarraf (UK), S Aik (Malaysia), H El-Barbary (Egypt), Y Jabbar (UK), A Ramdan (Malaysia), M Abdelaal (Egypt)

### Session II - Controversies in Primary Total Hip Arthroplasty

**Moderator/s:** HS Chua (Malaysia), O Marin-Peña (Spain)

**Speakers:** O Marin-Peña (Spain), G Solayar (Malaysia), P Hernigou (France), HS Chua (Malaysia), C Di Bella (Australia), M Sharma (India)

# SUBSPECIALTY DAY

Wednesday,  
28 September 2022

We are happy to announce the first Specialty Day presented by our subspecialty Chairs. This unique feature of the SICOT Annual Meeting offers attendees a unique opportunity to exchange information and interact with one another while learning about the latest developments in their particular area of interest.

Earn additional credits and connect with professionals who share your specialty interest. Exchange experiences and ideas while learning about the latest developments to ensure superior patient care.

Topics range from international mission work to practice management, and from translational research to contemporary insights and best practices. Sessions will include scientific papers, discussions, case-based presentations, debates, and surgical videos.

## INTERNATIONAL COURSE ON POLYTRAUMA MANAGEMENT

**Chairs:** HC Pape (Switzerland), R Pfeifer (Switzerland)

### Session I - Treatment Strategies in Polytrauma

**Moderator/s:** J Waddell (Canada)

**Speakers:** R Pfeifer (Switzerland), HC Pape (Switzerland), M Teuben (Switzerland)

### Session II - Modern Treatment of Pelvic Injuries

**Moderator/s:** J Saveski (North Macedonia)

**Speakers:** J Ashraf (India), J Parry (USA), J Saveski (North Macedonia)

### Session III - Modern Treatment of High-Energy Spine Injuries

**Moderator/s:** HL Kerr (UK)

**Speakers:** S Rajasekaran (India), I Hasani (North Macedonia), S Halvachizadeh (Switzerland)

### Session IV - Management of Major Extremity Trauma

**Moderator/s:** K Emara (Egypt)

**Speakers:** B Zelle (USA), A Shehu (Switzerland), W Alhomaied (Saudi Arabia), D Agraharam (India)

## DISASTERS MANAGEMENT SUBSPECIALTY DAY

**Chair:** P Hérard (France)

### Session I - General Considerations

**Moderator/s:** A Hossain (Bangladesh)

**Speakers:** S Langhi (Libya), P Hérard (France), T Potokar (Switzerland)

### Session II - Early phase

**Moderator/s:** T Potokar (Switzerland)

**Speakers:** S Langhi (Libya), J Saveski (North Macedonia), A Hossain (Bangladesh), P Hérard (France), R Fakhri (Jordan)

### Session III - Late phase

**Moderator/s:** P Hérard (France)

**Speakers:** T Potokar (Switzerland), A Hossain (Bangladesh), S Langhi (Libya)

# SICOT DIPLOMA EXAMINATION

Thursday 29 September

In 2003, for the first time, SICOT held an examination for orthopaedic trainees during its Annual International Conference in Cairo, Egypt. The overall results of this first experience were very encouraging, and a SICOT Diploma Examination has been held every year since then.

As we move towards digitalising educational delivery, the first part will select the candidates for the first time through our brand new PIONEER Learning Management System on Saturday 13 August 2022. The 18th SICOT Diploma Examination will take place face-to-face on Thursday 29 September at the Kuala Lumpur Convention Centre.

The SICOT Diploma Examination aims to set a global standard for examination in Trauma and Orthopaedics. The exam tests the core clinical knowledge and competence of the orthopaedic candidate or surgeon in practice. The syllabus ([www.sicot.org/diploma-examination](http://www.sicot.org/diploma-examination)) for the exam is broad, covering the whole breadth of Trauma and Orthopaedics, which can be applied globally. The candidate must be able to demonstrate clinical knowledge and competence appropriate to orthopaedic and trauma surgery across the whole breadth.

The syllabus is broadly divided into the following four domains:

Basic Sciences – including Oncology and Infection  
Trauma  
Adult Pathology – Spine and Lower Limb  
Upper Limb and Paediatric Orthopaedics

## *FREE PAPER, SHORT FREE PAPER, JUST-A-MINUTE & E-POSTER PRESENTATIONS*

As usual our programme will be packed with your Free Paper, Short Free Paper, Just-A-Minute and e-Poster presentations; we are honoured that **more than a thousand abstracts** were submitted for this year's Congress! We can't wait to hear all about your latest research and clinical experiences!
